

# **Dr. Virendra Swarup Institute of Professional Studies**

**Session 2019-20**

## **Institutional Distinctiveness**

The Institute is always working on the latest teaching techniques, So that our upcoming teachers will not feel unconfident if placed in the best school . best updated facilities of different Labs and subjects are taught . The students are provided best of computer training facilities, psychological lab , science labs and language and lab etc. The students are provided LMS facility (lecture videos through PPTs) for better learning at home also. They are provided smart classes training and other advanced technology that can knock the future bright opportunities. LMS system has been adopted to provide online lectures to the students. This is the big reason the students get the vast opportunities of placement. Also the placement drive cells are activated in this direction only. Any teaching vacancy is immediately informed to the students and therefore the updated competitive students grab the post. It aims to provide the detailed performance of institution in one area distinctive to its vision, priority and thrust .

The Teachers also use online platforms over and above offline lectures . By this initiative our all students can attend the classes at their case as the recorded lectures are also shared . We even arrange for online objective papers so that students can revise their knowledge and evaluate themselves from time to time .
